Professional Summary

Low level Video Game Developer with 5+ years of experience designing gameplay systems, real-time graphics, and simulations in Unity and Unreal Engine for VR and Mobile hardware. Expertise in OpenGL, Vulkan, WebGL, custom engine tools, shader programming, and cross-functional team leadership. Passionate about user experience, engine optimization, and gameplay innovation.

Technical Skills

- **Programming Languages:** C++, C#, HLSL, Lua, Typescript, React, Python
- **Game Engines:** Unreal Engine, Unity 3D
- **Graphics:** OpenGL, Vulkan, PBR, Shader Development, WebGL
- **Design Tools:** Adobe Photoshop, Blender, Figma
- **Other:** SDF, Navigation Mesh, AI Behavior Trees, UI Programming,

Professional Experience

Gameplay Developer

Oct 2025 – present

Titan1Studios – Toronto, ON, Canada

- Worked on different Gameplay systems
- Updated HLSL Shaders code to add custom lighting and shadow data and worked with updated legacy render passes to Record Render Graphs
- Ported Desktop Gameplay logic to Meta Quest Platform

Esports Content Creator

Sep 2024 – Apr 2025

Fanshawe College – London, ON, Canada

- Created promotional content for FUEL Esports using Adobe Photoshop
- Provided technical support for LAN events and Twitch livestreams
- Assisted players with setup and logistics during events

Research Assistant

Aug 2024 – Nov 2024

Fanshawe College – London, ON, Canada

- Contributed to a machine learning project predicting polymer properties using SMILES strings
- Designed scraping algorithms for scientific web databases and implemented Rule of Mixtures prediction logic

Senior Gameplay Programmer
Pixeltek Game Solutions – Mumbai, India

Jul 2019 – Aug 2023

- Led a cross-functional team of 8 developers and artists to design VR experiences and developed in-engine and in-game tools.
- Developed real-time cloth simulation for various fabric types, dynamic pattern editing, and color customization
- Implemented AI pathfinding and behavior systems for virtual runway models

Education

Graduate Certificate, User Experience Design
Fanshawe College – London, ON

2024 – 2025

- Focused on human-centered UI/UX through interviews, journey maps, and usability testing
- Designed interactive prototypes using Figma based on tree testing and empathy mapping

Graduate Certificate, Game Development – Advanced Programming
Fanshawe College – London, ON

2023 – 2024

- Built a custom C++ game engine with OpenGL integration
- Developed a GLSL shader compiler, PBR lighting system, and Bullet Physics
- Implemented navigation mesh generation and A* pathfinding algorithm

Diploma, Game Design
FX School – Mumbai, India

2017 – 2018

- Learned end-to-end game development pipeline from concept art to production
- Developed *BRUNE*, a first-person adventure game as a capstone project

Bachelor of Engineering, Computer Engineering
University of Mumbai – Mumbai, India

2015 – 2019

- Final year project: Interactive electrical circuit simulator built in Unreal Engine
